

Genie U

12/24/32

A single unit for Type I ultrapure and RO water from tap water

Two-in-one integrated system. Quality of ultrapure water meets or exceeds ASTM, CLSI, CAP, and ISO Type I water standards.

The system is manufactured in an ISO 9001: 2015 certified manufacturing site.

- Wireless communication amongst components providing unlimited possibilities
- RFID tracking of consumables and RO membranes to ensure optimal system performance
- On-line TOC measurement based on complete oxidation methodology
- Stable RO permeability over a wide range of water temperatures
- A full range of cartridges for various applications including ultra-low TOC, low Mg, low boron, ICP and DI type
- · Choices of final filters to remove specific contaminants
- Tank water level displayed from the continuous liquid level sensor of the storage tank
- Automatic system shut-off upon detection of any water leakage
- Optional tank circulation mode to keep the water quality stable in the tank

Main Components

Command and control center

- 8-inch touch screen allowing easy control and operation of the system
- Comfortable viewing and operation with built in viewing angle and flexible placement by users
- Operable with gloves and wet hands
- Robust screen: easy to clean, resistant to scratches

- system is no longer limited by the length of cables and wires.
 "1+N mode" one water system can drive N units of dispenser (Up to 10 now and can be upgraded further more).
- Genie equips with multiple touch screens which are highly responsive, water-proof, latex glove friendly, and perfect for wet labs
- Monitoring of consumables and accessories, through RFID technology, provides users with real-time operational intelligence.
- The ability to export and print data and log-in requirements are built into all of our Genie systems.
- Feed water conductivity monitoring ensures an optimal running conditions of the system.
- ♠ A RephiBio filter can be embraced to produce pyrogen, nuclease and bacteria free water for critical requirements.
- No tools are needed for system maintenance and simple service.

Control Console

Dispenser

All-in-one touch screen

- Manual and volumetric dispensing, adjustable dispensing rate, and water quality monitoring
- Compact dispenser allowing one handed operation and control
- Operable with gloves and wet hands
- Height adjustable and 360 degree rotatable on an anti-skid base

Cartridges

Cartridges

- Improved stability of water quality & efficiency of polishing resins due to optimized flow design
- High pressure rated housings, proprietary sealing, and double o-ring designs ensuring operational confidence
- A worry-free installation with three verifications: color, words, and RFID recognition

Specifications

	Cania II
5 1114 - 5	Genie U
Feed Water Requirements	
Feed water conductivity / TDS	< 2000 μS/cm / < 1000 ppm
Operating temperature	5 - 45 °C
Feed water pressure	1 - 6 kg/cm ² (15 - 90 psi)
Product Water Quality	
RO water	
Flow rate	12, 24, 32 L/hr
Dispenser rate	0 - 2 L/min
Conductivity (@25℃)	Typically < 20 μ S/cm (feed water < 2000 μ S/cm
Ultrapure water	
Dispenser rate	0 - 2 L/min
Resistivity (@25°C)	18.2 MΩ·cm
TOC*	< 5 ppb
Particles (> 0.2 µm)**	No Particles with size > 0.22 μm
Microorganisms***	< 0.1 cfu/ml
Pyrogens (endotoxins)****	< 0.001 Eu/ml
RNAse***	< 0.5 pg/ml
DNAse****	< 10 pg/ml
Dimensions	
Main system: Width x Depth x Height	32 cm × 44 cm × 54 cm
Dispenser: Width x Depth x Height	21 cm × 29 cm × 61 cm

- * Product water quality may vary due to local feed water conditions.
- ** with a 0.2 μm final filter
- *** with a 0.2 µm final filter or RephiBio filter
- **** with a RephiBio filter

Ordering Info

Description	Cat. No.
Genie U 12 System	RG0U01000
Genie U 12 System, with TOC	RG0U010T0
Genie U 24 System	RG0U02000
Genie U 24 System, with TOC	RG0U020T0
Genie U 32 System	RG0U03000
Genie U 32 System, with TOC	RG0U030T0

Main Applications

With Ultrapure Water

- HPLC mobile phase preparation
- Preparation of reagent blank solutions
- As sample diluent for GC, HPLC, ICP-MS, AA and other analytical techniques
- Preparation of buffers and culture media for mammalian cell culture
- Preparation of molecular biology reagents, etc.

With RO Water

- Glassware cleaning
- Washing machine for glassware
- Water bath water
- Autoclave
- Feed water for laboratory animals
